Brenntag and HOCHTIEF Projektentwicklung hold topping-out ceremony in Essen

Mülheim/Ruhr, November 22, 2016

Brenntag, the global market leader in chemical distribution, is holding the topping-out ceremony for its new company headquarters today together with project development company HOCHTIEF Projektentwicklung, recognising the completion of the major building phase. Brenntag is to move into the newly built "House of Elements" in Essen-Rüttenscheid in the second half of 2017.

Located in the Gruga Carree in Essen, the six-story building will be in line with the sustainability criteria of the "Leadership in Energy and Environmental Design" (LEED) Gold Standard. The building is being constructed on a comb-shaped ground plan with a main section and four adjoining sections set at right angles – the upper floors are accessed by four staircase cores with two elevators each. The first floor will be expanded into a double-height lobby at the intersection of Messeallee and Strassburger Strasse and a conference zone and employee restaurant built on the same level. The company-owned below-grade parking garage will house up to 246 cars. The building, which has a gross floor area of around 20,700 square meters, will provide office space for some 650 employees in future.

About Brenntag:

Brenntag, the global market leader in chemical distribution, covers all major markets with its extensive product and service portfolio. Headquartered in Mülheim an der Ruhr, Germany, the company operates a global network with more than 530 locations in 74 countries. In 2015, the company, which has a global workforce of more than 14,000 employees, generated sales of EUR 10.3 billion (USD 11.5 billion). Brenntag connects chemical manufacturers and chemical users. The company supports its customers and suppliers with tailor-made distribution solutions for industrial and specialty chemicals. With over 10,000 products and a world-class supplier base, Brenntag offers one-stop-
shop solutions to around 180,000 customers. This includes specific application technology, an extensive technical support and value-added services such as just-in-time delivery, product mixing, formulation, repackaging, inventory management and drum return handling. Long-standing experience and local excellence in the individual countries characterize the global market leader for chemical distribution.

**About HOCHTIEF:**
HOCHTIEF is one of the most international construction groups worldwide. The company delivers complex infrastructure projects, in some cases on the basis of concession models. The Group operates in the transportation infrastructure, energy infrastructure and social/urban infrastructure segments as well as in the contract mining business. With around 53,000 employees and a sales volume of more than EUR 22 billion in FY 2014, HOCHTIEF is represented in all the world’s major markets. With its subsidiary Leighton, the Group is market leader in Australia. In the USA, the biggest construction market in the world, HOCHTIEF is the No. 1 general builder via its subsidiary Turner and, with Group company Flatiron, ranks among the most important players in the field of transportation infrastructure construction. Because of its engagement for sustainability, HOCHTIEF has been listed in the Dow Jones Sustainability Indexes since 2006.

HOCHTIEF Projektentwicklung as a subsidiary of the HOCHTIEF Group has been developing, realizing and marketing real estate projects in Germany and abroad since 1991 and is considered Germany's leading inner-city center developer. Its core business comprises office buildings in downtown locations and areas within easy reach of city centers. It also focuses on residential properties, retail properties, hotels, and the development of entire urban quarters. HOCHTIEF Projektentwicklung does not build up any property portfolio of its own but operates as an "interim investor" with the goal of selling the projects to a final investor well-let and as swiftly as possible. With its offices in Germany and Europe, the company makes sure it is close to its clients.
Sustainable concepts, prime locations, sophisticated architecture and innovative technology make for value creation and cost reductions.
