

SWEET ALMOND OIL ORGANIC

PRODUCT DATA SHEET

SWEET ALMOND OIL ORGANIC is a Vegetable Oil obtained from the dried kernels of the almond tree. Almonds contain folic acid, alpha tocopherol and zinc, which are useful for the treatment of skin disorders. It has been used for centuries both medicinally and cosmetically as a muscle-relaxer, cleanser and moisturizer to name just a few of its applications.

SWEET ALMOND OIL is high in mono and polyunsaturated fatty acids, minerals and glycosides. Fatty acids are necessary along with glycerol for the cell to function normally.

SWEET ALMOND OIL ORGANIC also contains vitamins A, B1, B2, B6 with small amounts of Vitamin E and D. Due to the presence of Vitamin E the oil has antioxidant capability. Antioxidants protect vital cell structures by neutralizing free radicals.

Topical vitamin E has shown to have a wide variety of skin benefits. Many studies have shown that it can help decrease the effects of psoriasis, erythema, and may help in reducing the risk of skin cancer. Vitamin E also helps in the reduction of scarring from wounds and on the appearance of stretch marks on the skin.

Fatty acids composition (Fatty Acid Fraction):

Oleic acid	62.0 - 86.0 %

OIL STABILITY INDEX (OSI)

The Oil Stability Index (OSI) was determined using a Rancimat instrument. The rapidity of oxidation of an oil depends on the degree of unsaturation, the presence of antioxidants, and prior storage conditions. In the OSI analysis, the rate of oxidation is slow until resistance to oxidation is overcome. This time is known as the oxidation induction period and it is a tool to determine the useful life of the oil.

SWEET ALMOND OIL ORGANIC OSI: 5.2 hours (100 °C)
