

Technical Data Sheet

Date	: June 2019	Page no.	: Page 1 of 3
------	-------------	----------	---------------

Sprayspheres SC can be encapsulated with a range of vitamins, fragrances, oils etc. and also used to create visual effects in a range of personal care water-based formulations such as facial cleansers, creams, lotions, gels, emulsions, soaps etc. The beads are hard when dry and have a long shelf life without any added preservatives. They remain suspended in formulations and disappear on gentle rubbing.

PRODUCT INFORMATION :

Product Name: SPRAYSPHERES SC (SC-SI-VE-2001-VS)		
	Ingredients	CAS NO.
Ingredient Declaration :	<ul style="list-style-type: none"> Hydroxypropyl Methylcellulose (HPMC) Lactose Microcrystalline cellulose Titanium Dioxide Vitamin E Synthetic Fluorophlogopite 	9004-65-3 63-42-3 9004-34-6 13463-67-7 10191-41-0 12003-38-2
Country of origin : India		

ANALYTICAL INFORMATION:-

Test	Specification
Appearance	Free-flowing, silver cooled spheres.
Solubility	Partially soluble in water
Particle Size	NLT 80 % should pass through 30# & NMT 20% should pass through 50#.
Loss on drying	NMT 8.0% w/w.
Bulk Density	NLT 0.6 gm/cc.
pH (1 % slurry)	5.0 - 8.0.
Leaching Test	Stable at: pH 3.0 pH 5.5 pH 8.0

GENERAL INFORMATION:-

1.	Properties	SC beads are hard when dry but soften in contact with at least 20 % water. They disappear on gentle rubbing when used on the skin without leaving any shell residue. Sprayspheres are stable over a wide range of pH 5.0 to 8.0, are safe and non-toxic.
-----------	-------------------	--

Technical Data Sheet

Date	: June 2019	Page no.	: Page 2 of 3
------	-------------	----------	---------------

2.	Composition	SC beads contain Lactose, Microcrystalline cellulose, Hydroxypropyl methylcellulose (HPMC), Vitamin E, Synthetic Fluorophlogopite.
3.	Absences of Impurities	Impurities like glycols, dioxins, glutens, formaldehyde, residual solvents are absent.
4.	GMO / BSE	The ingredients used for manufacturing these beads are not based on animal derived source and are not of genetically modified origin.
5.	CMR	The products are free from any of the special risk substances classified as carcinogenic, mutagenic or toxic for reproduction.
6.	Manufacturing & Quality Control	The entire manufacturing operations are carried out using equipment's in hygienic clean facilities to ensure high quality of final product. The quality of the products is always assured by the specifically laid down quality control practices. The well-equipped analytical laboratory ensures the use of the prescribed quality material, and follows processes in place for final analysis of the product.

HANDLING & PROCESSING INFORMATION:-

1.	Processing of Final Product	SC beads are partially soluble in water and not hygroscopic. They are hard when dry but soften in contact with at least 20% water. Avoid any ingredients that could act as solvents or cause other incompatibilities with ingredients of the Sprayspheres. There is a risk of sedimentation in all aqueous systems, surfactant products and liquid emulsions. Therefore use of mixtures containing synthetic and natural polymers is recommended as they give better results than one thickening agent alone or ensuring that the final formulation has sufficient viscosity and internal gel structure.
2.	Handling	Any mechanical influences on the beads should be avoided during manufacturing and filling processes. High shearing like homogenization, which is a common process for emulsifying cosmetic formulations will destroy the spheres. The beads should be only be added at the very end of the manufacturing process with slow and gentle stirring.
3.	Stability	Due to the inert ingredients used for manufacturing, the spheres are very stable at temperatures up to 25°C, pH-range 5 to 8. The individual stability data for Sprayspheres are available upon request. Stability studies have been carried out in different medias, the pH range stated and at two different temperatures.
4.	Addition procedure	Addition will be at room temperature (25°C) at the end of the process.
5.	Use Level	Depending on particle size and performance desired, Sprayspheres are typically used between 0.5 - 2.0 % in the final product.

Technical Data Sheet

Date	:	June 2019	Page no.	:	Page 3 of 3
------	---	-----------	----------	---	-------------

6.	Storage	Store in a tightly closed container in dry place at temperature 25°C .
7.	Safety	The product is safe and non-toxic for its intended use. Avoid inhalation of dust of product or contact with eyes, mouth or nose by taking suitable preventive measures. Also refer to Material Safety Data Sheet .
8.	Shelf life	3 years from the date of manufacturing.

DISCLAIMER:-
