

Vikoflex[®] 5075

Epoxidized Propylene Glycol Dioleate Plasticizer

PRODUCT DESCRIPTION

Vikoflex[®] 5075 is a high quality monomeric epoxy plasticizer which offers low volatility, low temperature flexibility and high compatibility in polyvinyl chloride systems. The low viscosity of Vikoflex[®] 5075 epoxidized propylene glycol dioleate plasticizer makes it suitable for plastisol and organosol formulations. The epoxy functionality provides excellent heat and light stability.

TYPICAL PHYSICAL PROPERTIES

Oxirane Oxygen	4.4% Min
Acid Value	1.0 Max
Viscosity Stokes @ 25°C	1.2
Color - APHA	175 Max
Flash Point	< 500°F
Freeze Point	32°F

SUGGESTIONS FOR USE

- High specification medical formulations
- Semi-rigid and flexible vinyl formulation
- Vinyl plastisol and organosols
- Coated fabrics
- Automotive interiors and moldings

PACKAGING

Vikoflex[®] 5075 epoxidized propylene glycol dioleate plasticizer is available in 55 gallon (420 lb net) steel drums and 40,000 lb bulk tanktrucks.

Arkema has implemented a Medical Policy regarding the use of Arkema products in Medical Devices applications that are in contact with the body or circulating bodily fluids (<http://www.arkema.com/en/social-responsibility/responsibleproduct-management/medical-device-policy/index.html>). Arkema has designated Medical grades to be used for such Medical Device applications. Products that have not been designated as Medical grades are not authorized by Arkema for use in Medical Device applications that are in contact with the body or circulating bodily fluids. In addition, Arkema strictly prohibits the use of any Arkema products in Medical Device applications that are implanted in the body or in contact with bodily fluids or tissues for greater than 30 days. The Arkema trademarks and the Arkema name shall not be used in conjunction with customers' medical devices, including without limitation, permanent or temporary implantable devices, and customers shall not represent to anyone else, that Arkema allows, endorses or permits the use of Arkema products in such medical devices.

It is the sole responsibility of the manufacturer of the medical device to determine the suitability (including biocompatibility) of all raw materials, products and components, including any medical grade Arkema products, in order to ensure that the final end-use product is safe for its end use; performs or functions as intended; and complies with all applicable legal and regulatory requirements (FDA or other national drug agencies). It is the sole responsibility of the manufacturer of the medical device to conduct all necessary tests and inspections and to evaluate the medical device under actual end-use requirements and to adequately advise and warn purchasers, users, and/or learned intermediaries (such as physicians) of pertinent risks and fulfill any postmarket surveillance obligations. Any decision regarding the appropriateness of a particular Arkema material in a particular medical device should be based on the judgment of the manufacturer, seller, the competent authority, and the treating physician.
