

# BKS 2640 Resin

BKS 2640 is a phenolic resin solution for coatings of rigid metallic substrates.

It is generally used with nitrile rubber (high acrylonitrile) for adhesives. It is also used in plastisol primers and adhesion promoters for solution vinyl resins.

## Applications

Acrylonitrile-based adhesives, Coatings, Plastisol primers, Protective coatings, Protective coatings: Drum and pail, Protective coatings: Metal protection

## Product Composition

Heat-reactive phenolic resin solution in butanol

## Appearance/Form

Liquid

## Certifications

Conforms to 21 CFR for: 175.105, 175.300, 176.170, 176.180, and 177.1211

## Typical Properties

<b>Form</b>	Solution in n-Butanol
<b>Viscosity @25°C, cP (mPa*sec)</b>	300 - 900
<b>Solids, wt., %</b>	45 - 49
<b>Specific Gravity @25°C</b>	0.97 – 1.00

## Packaging

Drums

## Storage and Handling

BKS resins are heat-reactive resins with a limited shelf life. Extended storage at high temperatures should be avoided to prolong the useful life of the resins. It is suggested that the resin be stored at or below 60°F in order to extend storage life. BKS resins should be used in a well-ventilated area.
