

DFM-PDS-NA-Advantage 951-R2

Advantage™ 951 defoaming agent

Product Description

Advantage™ 951 defoaming agent is a hydrocarbon oil-based defoamer designed to improve drainage by removing foam in brownstock washer applications. It has been shown effective in a wide variety of applications in kraft pulp washing.

Advantage 951 is fast acting and demonstrates superior lasting power which aids in carrythrough and reduces need for multiple addition points.

Product Application

Advantage 951 can be metered into the foaming system as received. Alternately it may be pre-diluted in-line with water or liquor and added either to the vats or showers. For especially troublesome surface foams a shower bar is sometimes employed.

Advantage 951 is compatible with mild steel storage and delivery systems commonly used for oil-based defoamers.

Advantage 951 is to be used in accordance with control procedures Solenis establishes for a specific application.

Benefits

- Highly effective in maximizing pulp production through high foam kill.
- Specially formulated to be fast acting and long lasting.
- Made with oils certified to contain non-detectable levels of DBD and DBF precursors.
- Effective in most washer systems including traditional drum washer and compaction baffle washer systems

Packaging

This product is available in a variety of packaging sizes. Your Solenis representative will recommend the appropriate packaging for the application.

Important Information

Typical Properties: Refer to the Safety Data Sheet (SDS).

Regulatory Information: Refer to the SDS or contact your sales representative for any additional regulatory and environmental information.

Safety: Solenis maintains an SDS for all of its products. Use the health and safety information contained in the SDS to develop appropriate product handling procedures to protect your employees and customers.

Our SDS should be read and understood by all of your supervisory personnel and employees before using Solenis products in your facilities.
