

STL-PDS-NA-Advantage CS9600-R2

Advantage™ CS9600 defoaming agent

Product Description

Advantage™ CS9600 defoaming agent is a high performance silicone emulsion defoaming agent formulated to provide a combination of immediate action and persistent foam control. It performs in aqueous foaming systems created by a variety of surfactants, and it is effective over a wide pH and temperature range. Optimum efficiency is at temperatures over 140 °F. Applications include inks, coatings, adhesives, textile finishing, leather processing, etc.

Product Application

Advantage CS9600 is designed for use in aqueous systems where foam must be controlled by chemical means. It is highly effective in applications involving high concentrations of foam generating surfactants and dispersants.

The feed rate of Advantage CS9600 will depend on the severity of the foam problem. Typical dosages will range between 0.01 to 3.0 %. Measurement of entrained air levels may be required to determine the most economical feed rate.

Advantage CS9600 is to be used in accordance with control procedures Solenis establishes for a specific application.

Benefits

- Easily dispersable in aqueous systems
- Prevents foam and entrained air
- Highly efficiency, low dosage rates
- Excellent mechanical stability and exhibits long lasting effectiveness

Packaging

This product is available in a variety of packaging sizes. Your Solenis representative will recommend the appropriate packaging for the application.

Important Information

Typical Properties: Refer to the Safety Data Sheet (SDS).

Regulatory Information: Refer to the SDS or contact your sales representative for any additional regulatory and environmental information.

Safety: Solenis maintains an SDS for all of its products. Use the health and safety information contained in the SDS to develop appropriate product handling procedures to protect your employees and customers.

Our SDS should be read and understood by all of your supervisory personnel and employees before using Solenis products in your facilities.
