

DFM-PDS-NA-Advantage NF2130-R2

Advantage™ NF2130 defoaming agent

Product Description

Advantage™ NF2130 defoaming agent is a high performance, water-extended defoamer formulated to provide excellent control of entrained air and surface foam on paper machines and effluent systems. It is a stable liquid that is easy to use and will function through a broad pH and temperature range.

It is most effective at temperatures between 60 °C and 70 °C (140 °F - 160 °F).

Product Application

Advantage NF2130 is a free-flowing liquid and may be introduced to the process directly from the container, or alternatively, may be injected into a water dilution line. Advantage NF2130 is most effective when it is applied immediately upstream or at the point where foam generation is occurring. Feed rates will vary depending upon the type and severity of the foam encountered. Suggested paper machine application points include the wire pit process chests, and sewer.

Storage and feeding of this product via systems made of mild steel are not recommended. Stainless steel, fiberglass and CPVC are materials of choice.

During storage, product should be mixed every two weeks using a properly designed recirculation system. If using partial shipments from rail cars, tank trucks or bulk bins, mixing is recommended prior to transfer or use. Protect from freezing.

Advantage NF2130 is to be used in accordance with control procedures Solenis establishes for a specific application.

Benefits

- Demonstrates superior cost-effectiveness over other conventional emulsion defoamers.
- Improves formation and drainage on paper machines.
- Recommended product for higher temperature, brown paper machines.

Packaging

This product is available in a variety of packaging sizes. Your Solenis representative will recommend the appropriate packaging for the application.

Important Information

Typical Properties: Refer to the Safety Data Sheet (SDS).

Regulatory Information: Refer to the SDS or contact your sales representative for any additional regulatory and environmental information.

Safety: Solenis maintains an SDS for all of its products. Use the health and safety information contained in the SDS to develop appropriate product handling procedures to protect your employees and customers.

Our SDS should be read and understood by all of your supervisory personnel and employees before using Solenis products in your facilities.
