

CTC-PDS-NA-Presstige FB9115-R2

## Presstige™ FB9115 felt cleaning and conditioning agent

### Product Description

Presstige™ FB9115 felt cleaning and conditioning agent is a high pH blend of solvents and surfactants effective on organic and inorganic contaminants, pitch and stickies. Surfactant emulsification improves the contact time between the solvent, the contaminants and the felt. Presstige FB9115 is highly effective as an intermittent felt conditioner on paper machines to produce the following benefits:

1. More uniform sheet moisture profile
2. Increased operating efficiency
3. Increased runnability during life of felt

### Product Application

Presstige FB9115 is typically applied directly into the felt conditioning shower water using a positive displacement chemical pump during down batches.

Proper treatment level depends on many factors such as the volume of water applied to the felts, the degree of felt plugging, paper/paperboard grade, wet end chemistry and additives, felt contaminants and shower water chemistry.

Recommended dosage for Presstige FB9115 is approximately 25% as product, based on shower flow. Optimum results can be obtained when conditioning water is heated to 130 °F (54 °C), a low volume, low pressure chemical shower is used and the shower is located as far upstream from the uhle box as possible. Solvents in this product are highly effective and also have a slight odor.

### Benefits

- Alkyl phenol ethoxylate( APE)-free formulation
- Minimizes felt related problems
- Maintains felt porosity and absorbency
- Removes solvent and alkali soluble felt contaminants
- Reduces organic and inorganic deposits within felts

### Packaging

This product is available in a variety of packaging sizes. Your Solenis representative will recommend the appropriate packaging for the application.

### Important Information

**Typical Properties:** Refer to the Safety Data Sheet (SDS).

**Regulatory Information:** Refer to the SDS or contact your sales representative for any additional regulatory and environmental information.

**Safety:** Solenis maintains an SDS for all of its products. Use the health and safety information contained in the SDS to develop appropriate product handling procedures to protect your employees and customers.

Our SDS should be read and understood by all of your supervisory personnel and employees before using Solenis products in your facilities.
