

Acrylic copolymer emulsion

## Technical Data Sheet

Name: Lacper<sup>®</sup>4600  
Revision Date: 2017-12-26

NO. WHSM\_4600  
Version: 1.1

### Product Description

**Lacper<sup>®</sup>4600** is a styrene-acrylic emulsion designed for wood coatings. It has good chemical resistance and adhesion. Biocide: CMIT/MIT 3:1 14ppm, and MIT 240ppm.

### Properties

1. Good pigment dispersing
2. Excellent resistance to chemicals
3. Excellent adhesion to many types of substance , including old film

### Characteristic data\*

Property	Value	Unit	Method
Appearance	Translucent to milky white		
Weight Solids	42-44	wt%	WHPU/T011-571-2017
pH	7-9		GB 6920-1986
MFFT	36	°C	GB/T 9267-2008
Viscosity	10-200	mPa·s	GB/T 2794-2013

\*Property values represent typical results only and are not to be considered as specifications, subject to specific COA

### Storage

The product should be stored in dry conditions above 5°C and below 35°C with the integrity of the packaging, and prevent direct sunlight. The validity of this product is for 12 months, performance assessment is recommended before use after more than 12 months. The product should be protected from freezing during storage. After opening the packing, suggested to use up one time.

Well filtration before using is necessary as normal water based binder.

**Disclaimer:** Wanhua Chemical Group Co., LTD. recommends that any customers of this material should check with Materials Safety Data Sheet (MSDS) for details about safely handling this material. We also suggest that you contact the suppliers of any other
