L-Cysteine hydrochloride monohydrate (for food use)

**Product description**

**Structural formula:**

\[
\text{HOOC}_3\text{NH}_3^+\text{Cl}^-\cdot\text{H}_2\text{O}
\]

Molecular weight: 175.64
Empirical formula: C₃H₇NO₂S.ClH.H₂O
CAS No.: 7048-04-6

Characters: a white or almost white, crystalline powder or colourless crystals, freely soluble in water, slightly soluble in alcohol. L-Cysteine is one of the 20 natural amino acids and, besides methionine, the only one which contains sulfur. WACKER has developed a new production method for this amino acid via fermentation from non-animal and non-human raw materials.

**Storage**

Storage and transportation: a temperature of 25°C is recommended for optimal product quality, but 40°C up to 180 days does not affect the quality. L-Cysteine hydrochloride monohydrate (for food use) has a shelf life of at least 24 months when stored in unbroken original packaging in dry storage areas.

The best use before date of each batch is shown on the product label. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

**Packaging**

Units of 25 kg

**Registration (selected countries / regions)**

Origin: vegetarian fermentation
Kosher certified
Halal certified

Listed on or in accordance with the following inventories:
AICS - Australia
DSL - Canada
ECL - Korea
EINECS - Europe
ENCS - Japan
PICCS - Philippines
TSCA - USA
IECSC - China

**Safety notes**

Advice for storage of incompatible materials: none known. Comprehensive instructions are given in the corresponding Material Safety Data Sheets. They are available on request from WACKER subsidiaries or may be printed via WACKER website http://www.wacker.com.

Particle size for the 20 Mesh quality: 50% < 100 micron (= 100*10^{-6} m), 1% > 800 micron (= 800*10^{-6} m). Particle size for the standard quality: not specified

The data presented in this leaflet are in accordance with the present state of our knowledge, but do not absolve the user from carefully checking all supplies immediately on receipt. We reserve the right to alter product constants within the scope of technical progress or new developments. The recommendations made in this leaflet should be checked by preliminary trials because of conditions during processing over which we have no control, especially where other companies' raw materials are also being used. The recommendations do not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and, if necessary, clarifying the position. Recommendations for use do not constitute a warranty, either express or implied, of the fitness or suitability of the products for a particular purpose.

The management system has been certified according to DIN EN ISO 9001 and DIN EN ISO 14001.
