Brenntag Water Treatment

Water has a substantial impact on virtually all parts of our daily lives. Therefore, our modern society depends on having access to a safe, reliable and clean supply of water to meet all of its various needs.

Brenntag Water Treatment understands the importance of ensuring that companies that are engaged in treating water do so with the most sophisticated and highest-quality products on the market. Brenntag Water Treatment, part of Brenntag’s Environmental division, has emerged to become the distribution partner of choice, and a global market leader, for companies in the industry. We offer a huge range of products and services, and a degree of technical expertise, which are absolutely essential for all areas and stages of water treatment. Whatever your request or business challenge, Brenntag Water Treatment will respond quickly and professionally to deliver customized solutions, from equipping you with the most state-of-the-art technology available on the market to providing technical advice to ensure your company complies with the industry’s highest safety and quality standards. Choosing Brenntag as your partner will make your daily business easier, as you can benefit from a vast number of advantages in terms of efficiency, service, management and expertise.

Efficiency

Developed societies in Europe and across the world often take clean water for granted as a part of daily life nowadays. Although sometimes unrecognized, companies that treat water to ensure a safe and reliable supply are performing a vital service that impacts the entire European continent. As the leading chemical distributor in Europe, Brenntag Water Treatment assists companies carrying out this important function by offering products and solutions tailor-made to each customer’s individual needs.

Our technicians and sales experts are adept at using our pan-European network to devise innovative solutions to any business problem and we work closely with suppliers to procure the highest-quality products on the market. Brenntag’s Key Account Managers, many of whom boast years of industry experience, are experts in their home regions and intimately familiar with their client’s business needs and operating environment.

The results are reduced supply-chain costs, improvements in efficiency and productivity and customized product offerings, such as application-specific mixtures and chemical formulas, which grant you and your firm the peace of mind to focus on your core business areas.
Service

Customers recognize that high-quality products, as well as an unparalleled degree of professional and technical service, stand behind the Brenntag name. The team at Brenntag Water Treatment consists of market experts who know their way through the industry’s ins and outs and possess an in-depth familiarity with both our customer’s needs and the entire Brenntag product line-up. By serving as the gateway to the wider Brenntag organization, our technicians and sales agents are able to reduce complexity for our customers and suppliers and respond quickly to concerns while still delivering the benefits that come from working with a company that is strongly present in every European market. To ensure you get the most out of your relationship with Brenntag, our technicians and sales agents remain in close contact with you to monitor improvements in technical performance and customer satisfaction.

Brenntag Water Treatment offers its customers a product range that encompasses chemicals used in all areas and stages of water treatment, including:

- Activated Carbon
- Coagulants
- Corrosion Inhibitors
- Customized Water Treatment
- Defoamers
- Disinfectants & Biocides
- Filtration Media
- Flocculants
- Formulations/Blends
- Heavy Metal Removal
- Ion Exchange Resins
- Membranes
- Nutrient Blends
- Odor Control
- Permangnates
- Scale Inhibitors

Management

The technicians and experts of Brenntag Water Treatment have built their reputation on supplying you with more than just state-of-the-art technology and high-quality products.

Customers who choose Brenntag Water Treatment as their chemical distributor gain access to our team’s extensive technical and market expertise as well. Our technicians, product experts and sales agents are committed to sharing their knowledge of Brenntag’s products and applications with our partners.

Our staff is trained to hold technical workshops and bespoke in-house seminars with you that are tailored to your individual needs, while our market-sector experts are adept at keeping customers and suppliers ahead of the curve by informing them on new product innovations and upcoming market trends.

Our laboratory technicians will work closely with you to devise customized formulas, while the team at Brenntag Water Treatment can make on-site visits to our partners to equip them with the know-how to ensure our customers get the most out of Brenntag’s products and services which have various applications in all areas of water treatment, from waste and potable water to swimming pools and processing water.
We are the global market-leader in full-line chemical distribution, linking chemical manufacturers and chemical users.

Brenntag provides business-to-business distribution solutions for industrial and specialty chemicals globally.

With over 10,000 products and a world-class supplier base, Brenntag is a full-line distributor to more than 170,000 customers worldwide. Headquartered in Mülheim an der Ruhr, Germany, Brenntag operates a global network of more than 480 locations in over 70 countries worldwide and with about 210 distribution centers in over 30 countries across Europe.

We believe we are your strongest possible partner.

Expertise

Legislation plays an increasingly prominent role each year in the treatment of drinking water, sewage water and wastewater. Because industry standards are becoming ever more complex and influential, it should come as no surprise that our team possesses a sophisticated understanding of the standards and legal requirements for safely treating water.

Our experts will work closely with you to share this environmental and legislative expertise and advise you on how to implement the industry’s most stringent environmental and safety requirements, ranging from all aspects of the EU’s REACH and biocide regulation to relevant regional and local legislation.

We endeavor to regularly keep our partners informed about on-go ing developments in legislation and EU and national regulation which could affect their business operations. Combined with our other product and service offerings, Brenntag Water Treatment is poised to offer you a unique combination of high-quality products and state-of-the-art technical expertise. The results for our customers and suppliers are a flexible approach to chemical distribution that delivers innovative solutions, best-in-class service and the widest product line in the industry. If you choose Brenntag Water Treatment, you are aligned with the industry’s top-ranking strategic partner, one who enables you to focus on your core business.

Brenntag – present everywhere you need us

Wherever you are – thanks to our pan-European network and our local presence, the evolved Brenntag organization is always close to you.
